

THE EB60. SEA CHANGE!

The EB60 is now in production!

Longer, sleeker, faster and more fuel efficient, this new model in the range is a contemporary version of the classic that created the 'DownEast' category.

Although not immediately apparent when she's sitting in the water, the EB60 is built on the world's most sophisticated hull design – the V-Warp®.

This guarantees that the '60 will be fast, stable in all conditions, highly manoeuvrable and unbelievably fuel efficient.
